Numbers listed in the right hand column of the table denote the approximate number range and the relevant production years are in the righthand column. During the 1970s ONLY a date code was put into the serial number. The third and fourth digits reveal the last two digits of the date; for example, 1272903 = 1972, 12781317 = 1978, and so forth.
